

Instructions for Allowing 3rd party cookies for Apple products

Understanding cookies:

What Are First-Party Cookies?

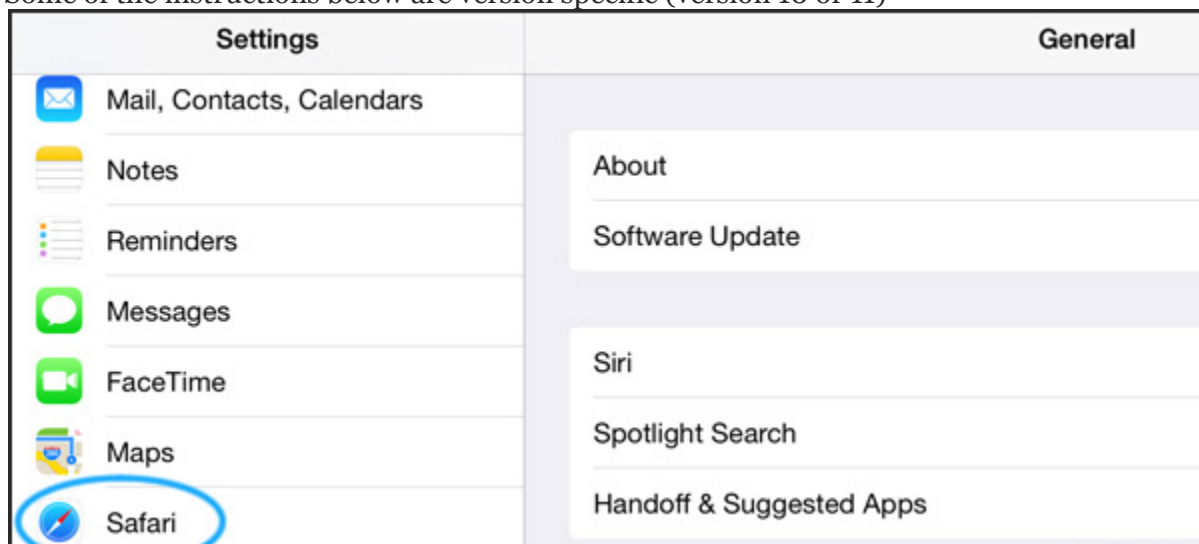

First-party cookies are created by the host domain – the domain the user is visiting. These types of cookies are generally considered good; they help provide a better user experience and keep the session open. This basically means the browser is able to remember key pieces of information, such as which items you add to shopping carts, your username and passwords, and language preferences.

What Are Third-Party Cookies?

Third-party cookies are those created by domains other than the one the user is visiting at the time, and are mainly used for tracking and online-advertising purposes. They also allow website owners to provide certain services, such as live chats. These are not necessary but do help.

First it is good to find out the version of IOS software you are running whether it is a MAC or iPhone or iPAD as there are different setting instructions for each.

To do this, go to your **settings**, and then to the **about**. There will find your version of IOS. Some of the instructions below are version specific (version 10 or 11)

Enabling Cookies for iPhone and iPad

*To enable cookies in Safari (iPhone/iPad **iOS 11**):*

1. Open your **Settings**.
2. Scroll down and select **Safari**.
3. Under **Privacy & Security**, turn off “**Prevent Cross-Site Tracking**” and “**Block All Cookies**”.

Open Settings, and then select Safari

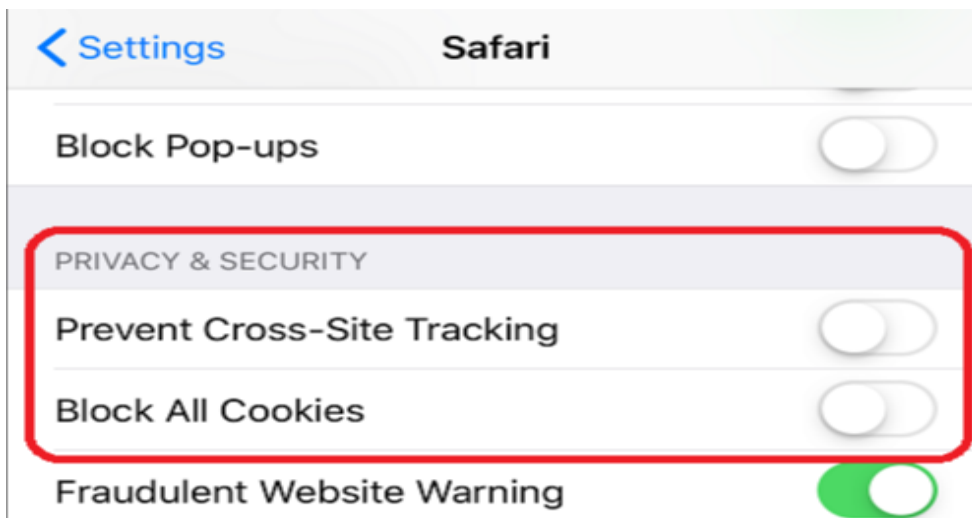

Select Safari

Then change 'Block all Cookies' to OFF by toggling the button from green to grey.

You must also turn off Cross-site tracking which right above the cookie button. Ensure both cookies and cross-site tracking are **BOTH are UNCHECKED**

To enable cookies in Safari (iPhone/iPad iOS 10):

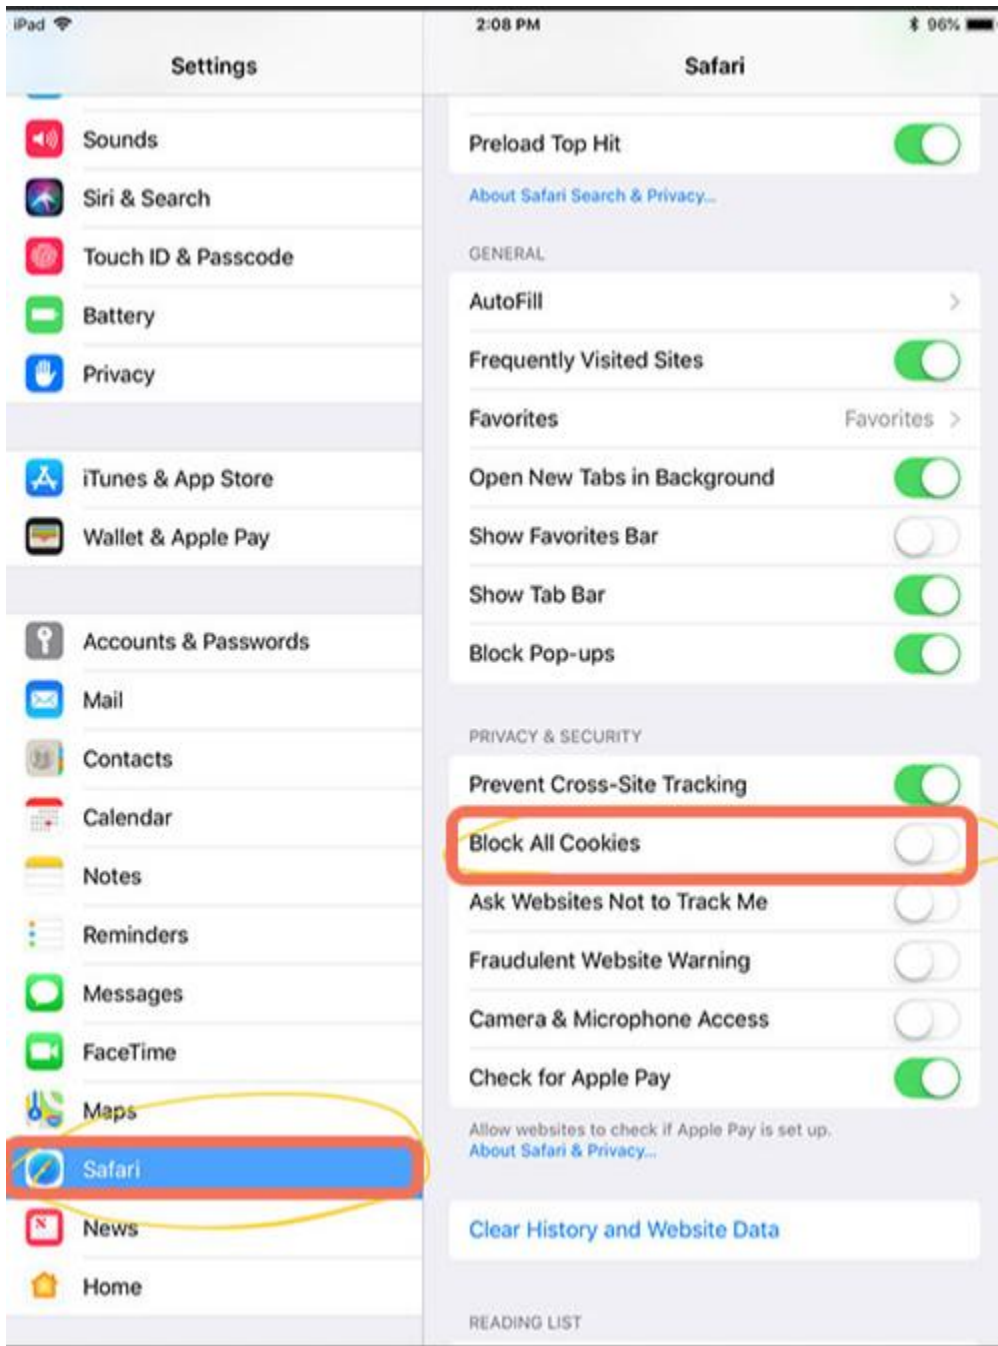

1. Open your **Settings**.
2. Scroll down and select **Safari**.
3. Under **Privacy & Security**, select “**Block Cookies**”.
4. Select “**Always Allow**” or “**Allow from Websites I Visit**”.

Open Settings, and then select Safari

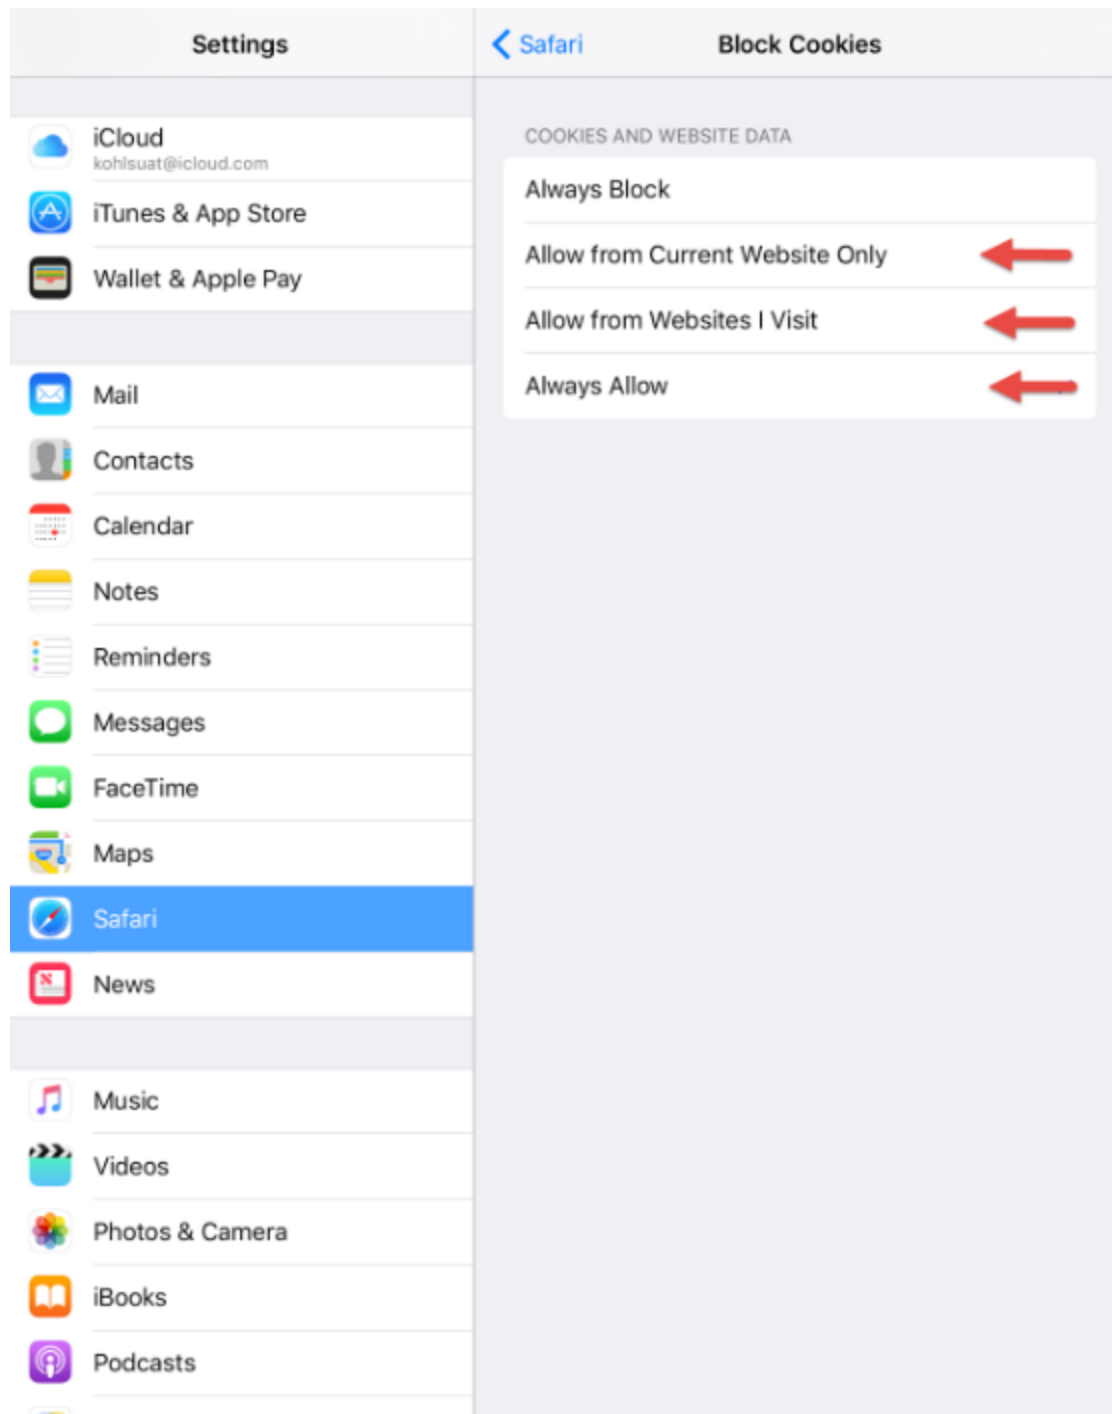

Select Safari

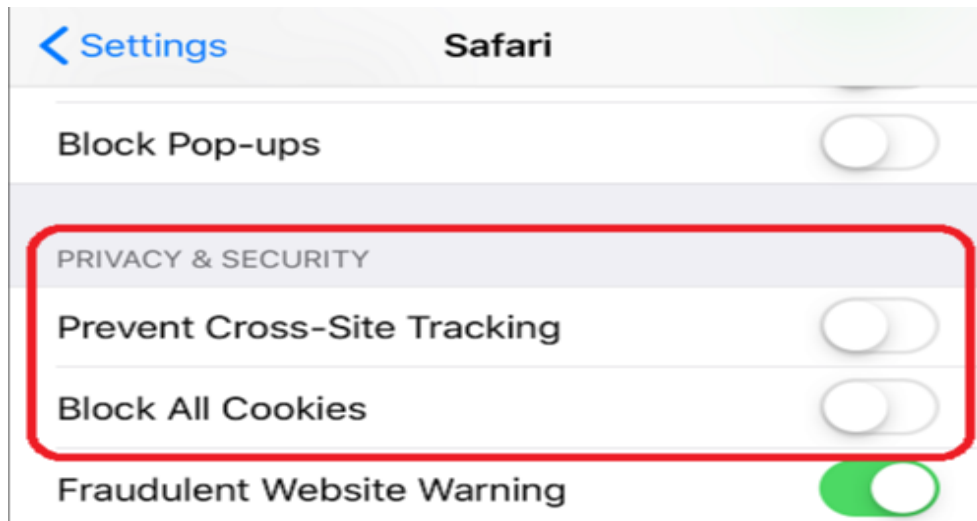

In IOS 10 you have some choices when you choose to allow the cookies (see arrows below). Any of those are fine and selection varies from *Always allow* to specific website you trust

You must also turn off Cross-site tracking which right above the cookie button. Ensure both cookies and cross-site tracking are **BOTH are UNCHECKED**

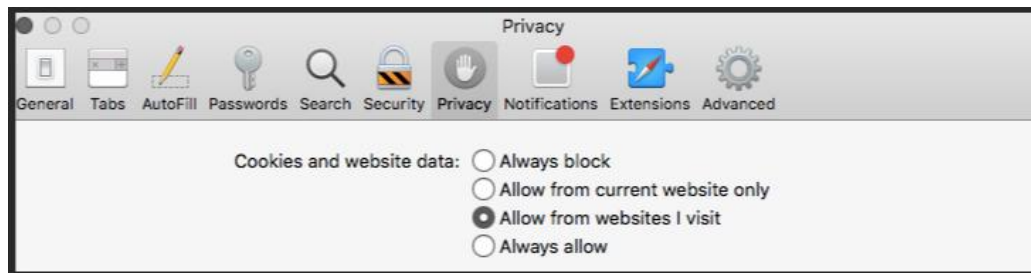

To enable cookies in Safari (Mac PC):

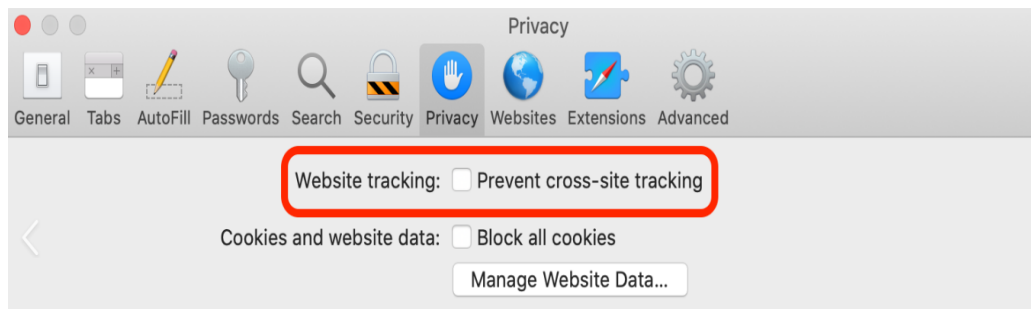

1. Go to the Safari drop-down menu.
2. Select Preferences.
3. Click Privacy in the top panel.
4. Under 'Block cookies' select the option 'Allow from current websites only' or 'Allow from website I visit'
5. For increased security, once you have finished using the site, you may change the Privacy setting back to Always if desired.

OR

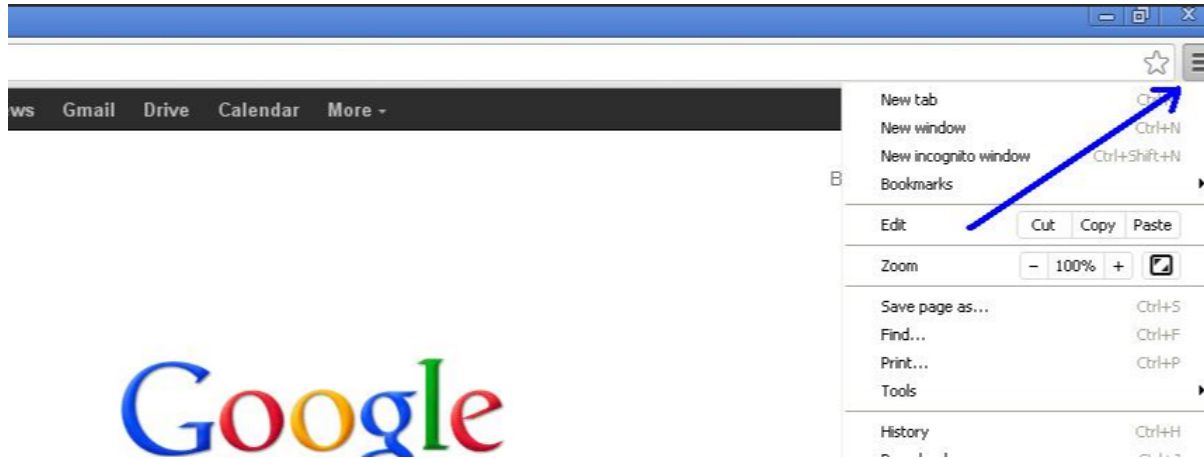

You must also turn off Cross-site tracking which right above the cookie button. Ensure both cookies and cross-site tracking are **BOTH UNCHECKED**

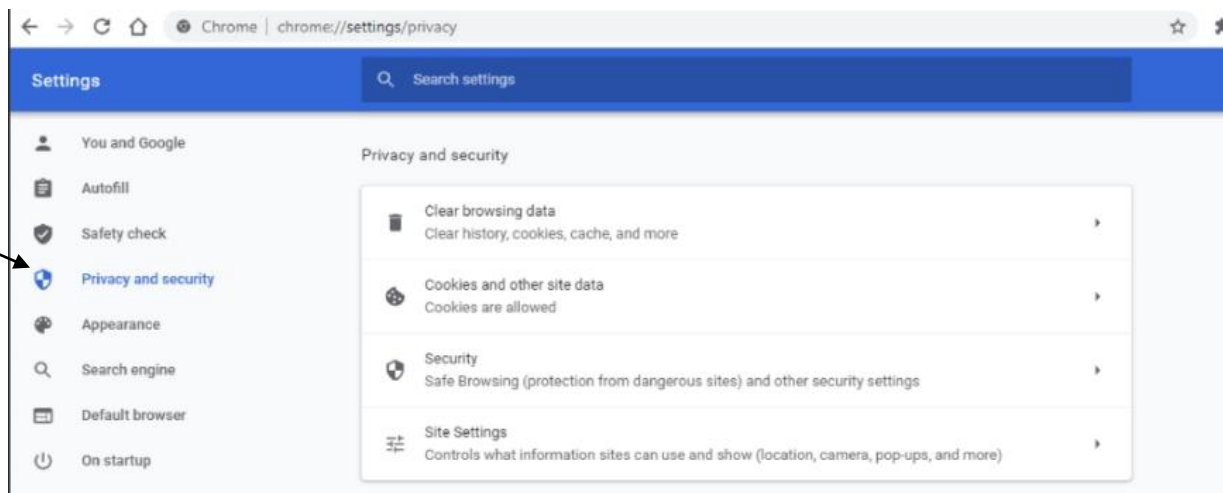

To enable cookies in Google Chrome (on Mac):

1. Open Chrome preferences click on Settings, then Show Advanced Settings.
2. Under Privacy, click on Content Settings.
3. Make sure “Block third-party cookies and site data” is **not** checked

Next click on Privacy and Security

Click on Cookies and other site data

Privacy and security

Clear browsing data
Clear history, cookies, cache, and more

Cookies and other site data
Third-party cookies are blocked in Incognito mode

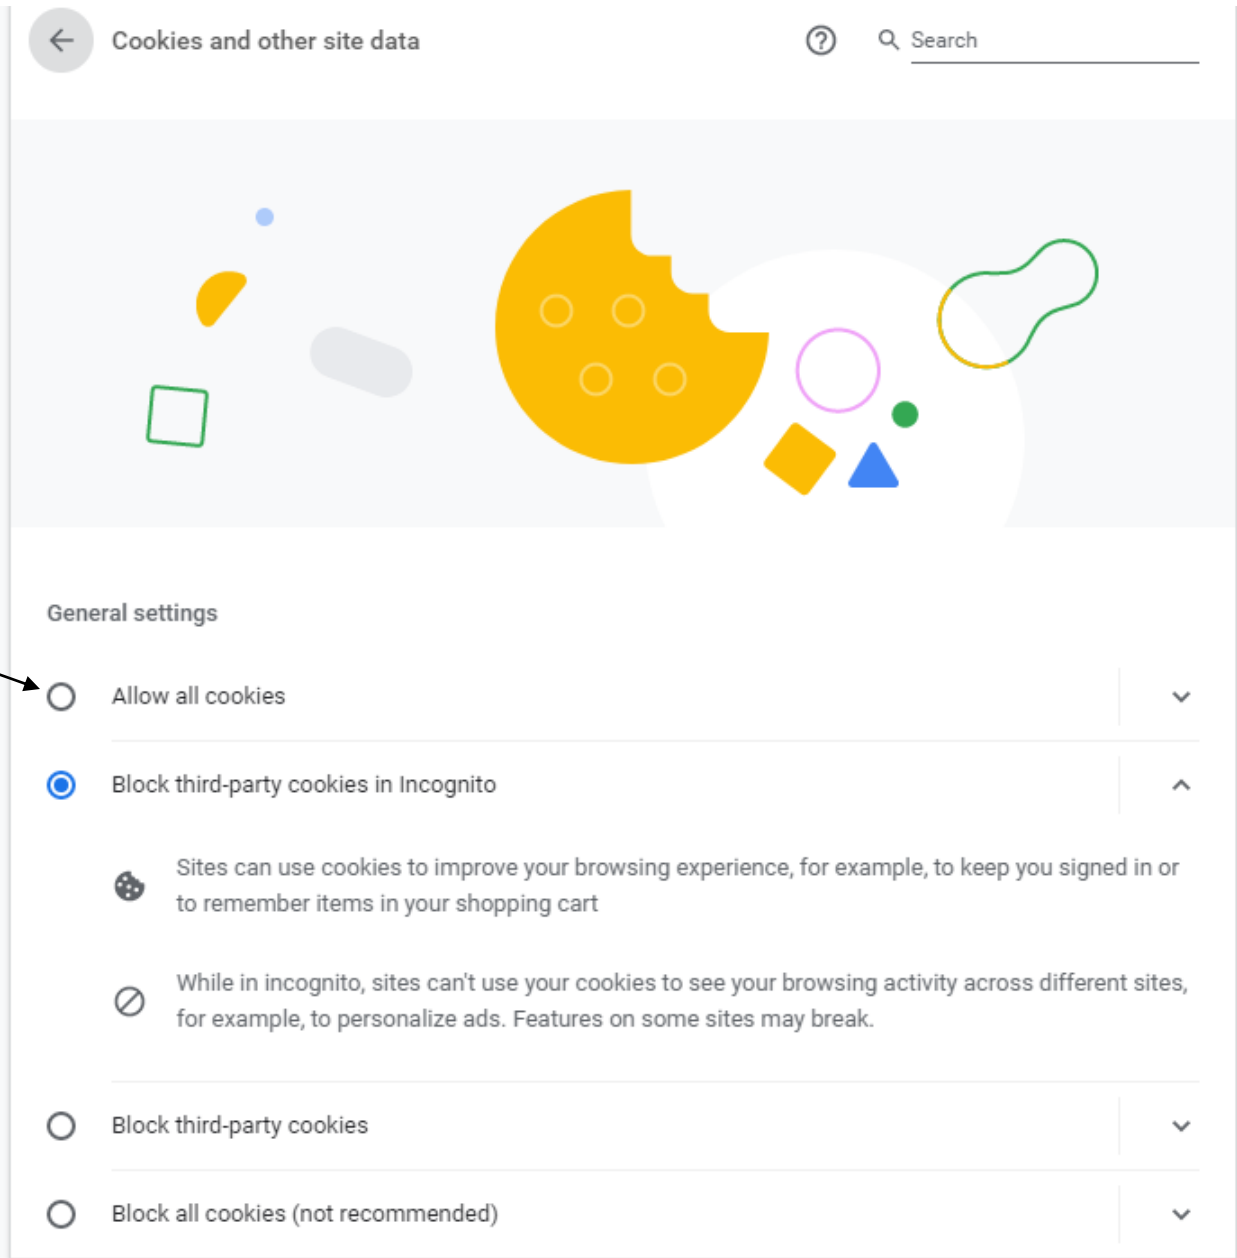

Security
Safe Browsing (protection from dangerous sites) and other security settings

Site Settings
Controls what information sites can use and show (location, camera, pop-ups, and more)

Click Allow all Cookies to allow all cookies

OR

For security protection you may block all sites for cookies **EXCEPT** ones you specify

General settings

Allow all cookies ▼

Block third-party cookies in Incognito ▲

 Sites can use cookies to improve your browsing experience, for example, to keep you signed in or to remember items in your shopping cart

While in incognito, sites can't use your cookies to see your browsing activity across different sites, for example, to personalize ads. Features on some sites may break.

Block third-party cookies ▼

Block all cookies (not recommended) ▼

Clear cookies and site data when you quit Chrome

Send a "Do Not Track" request with your browsing traffic

Preload pages for faster browsing and searching
Pre-fetches information from pages, including pages you have not yet visited. Information fetched may include cookies, if you allow cookies.

See all cookies and site data ▶

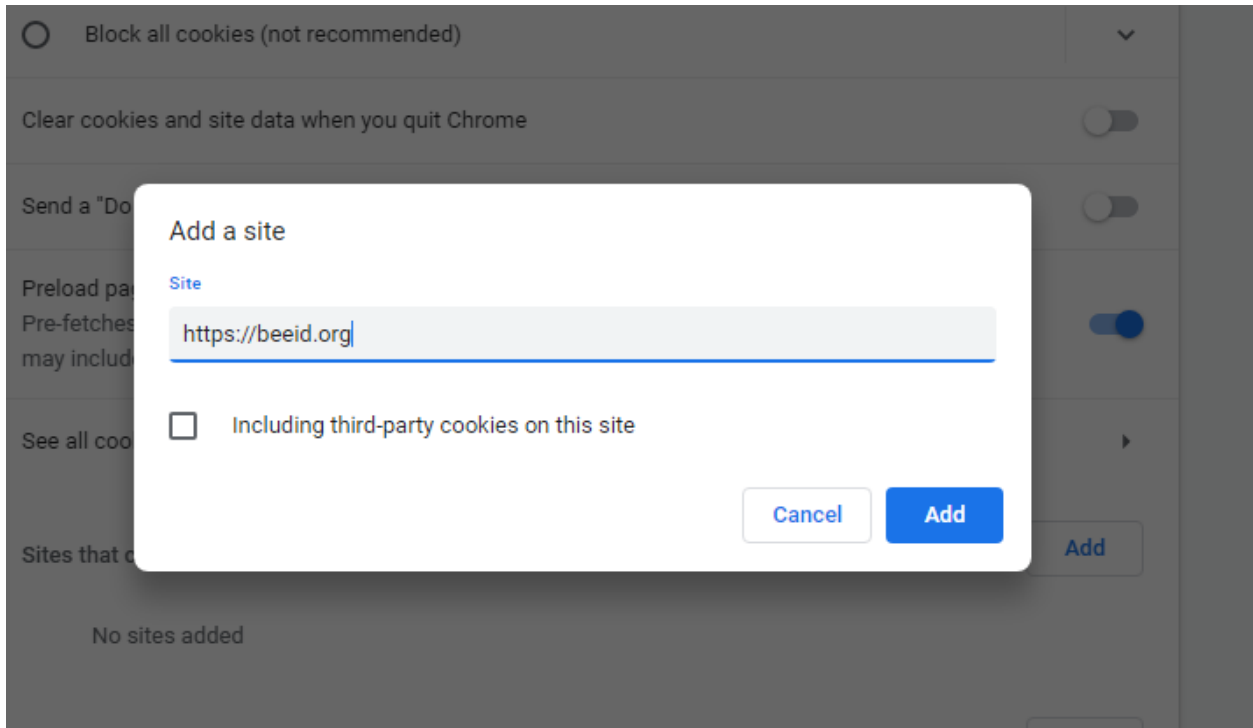

Sites that can always use cookies

Add

No sites added

Once you click "add" the next screen will ask you to add a website.

Here is where you can specify the RCMPVA membership site as shown in the next figure

You should now see the new site added and allowed to use cookies while blocking all others
